

Mexico's highest grade Silver producer

TSX:EXN | OTC:EXLLF

Investor Presentation – October 2014

EXCELLON

Forward Looking Statements

Disclaimer

This document contains “forward-looking statements” within the meaning of applicable Canadian securities legislation and applicable U.S. securities laws. Except for statements of historical fact relating to the Company, such forward-looking statements include, without limitation, statements regarding the future results of operations, performance and achievements of the Company, including potential property acquisitions, the timing, content, cost and results of proposed work programs, the discovery and delineation of mineral deposits/resources/reserves, geological interpretations, the potential of the Company’s properties, proposed production rates, potential mineral recovery processes and rates, business plans and future operating revenues. Forward looking statements are made based on management’s beliefs, estimates, assumptions and opinions on the date the statements are made. Although the Company believes that such statements are reasonable, it can give no assurance that such expectations will prove to be correct and the Company undertakes no obligation to forward-looking statements, except as may be required by law. Forward-looking statements are typically identified by words such as: believes, expects, anticipates, intends, estimates, targets, plans, postulates, and similar expressions, or are those which, by their nature, refer to future events. The Company cautions investors that any forward-looking statements by the Company are not guarantees of future results or performance, and that actual results may differ materially from those in forward-looking statements as a result of various risk factors, including, but not limited to, variations in the nature, quality and quantity of any mineral deposits that may be located, significant downward variations in the market price of any minerals produced (particularly silver), the Company’s inability to obtain any necessary permits, consents or authorizations required for its activities, to produce minerals from its properties successfully or profitably, to continue its projected growth, to raise the necessary capital or to be fully able to implement its business strategies. A description of the risk factors applicable to the Company can be found in the Company’s most recent Annual Information Form under “Description of the Business – Risk Factors”. All of the Company’s public disclosure filings may be accessed via www.sedar.com and readers are urged to review these materials, including the technical reports filed with respect to the Company’s mineral properties, and particularly the latest NI 43-101-compliant technical report prepared by Roscoe Postle Associates Inc. with respect to the Platosa Property. This document is not, and is not to be construed in any way as, an offer to buy or sell securities in the United States.

Cautionary Note to United States Investors Concerning Estimates of Measured, Indicated and Inferred Resources

The terms “Measured”, “Indicated” and “Inferred” Mineral Resources used or reference in this document are defined in accordance with Canadian National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”) under the guidelines set out in the Canadian Institute of Mining, Metallurgy and Petroleum (the “CIM”) Standards on Mineral Resources and Mineral Reserves. The CIM standards differ significantly from standards in the United States. United States investors are advised that while such terms are recognized and required by Canadian regulations, the United States Securities and Exchange Commission does not recognize them. “Inferred Mineral Resources” have a great amount of uncertainty as to their existence, and as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category or that Mineral Resources will ever be upgraded to Mineral Reserves. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of feasibility or other economic studies. United States investors are cautioned not to assume that all or any part of Indicated Mineral Resources will ever be converted into Mineral Reserves. United States investors are also cautioned not to assume that all or any part of an Inferred Mineral Resource exists or is economically or legally mineable, or that an Indicated Mineral Resource is economically or legally mineable.

Cautionary Note to United States Investors regarding Adjacent or Similar Properties

This document may also contain information with respect to adjacent or similar mineral properties in respect of which the Company has no interest or rights to explore or mine. The Company advises United States investors that the United States Securities and Exchange Commission’s mining guidelines strictly prohibit information of this type in documents filed with the SEC. Readers are cautioned that the Company has no interest in or right to acquire any interest in any such properties, and that mineral deposits on adjacent or similar properties are not indicative of mineral deposits on the Company’s properties.

Why Excellon?

HIGH GRADE

M+I Grade of 777 g/t Ag (20M AgEq oz @ 1,277 g/t AgEq)

LOW COST

\$10.44/Ag oz payable total cash cost (6-Mos 2014)

CASH FLOW

\$15.98/Ag oz payable all-in sustaining cost (6-Mos 2014)

SOLID MINE LIFE

Quality resource remaining with open potential

GROWING PRODUCTION PROFILE

Increasing production through optimization

Growing through acquisition strategy

Expanding resources through exploration

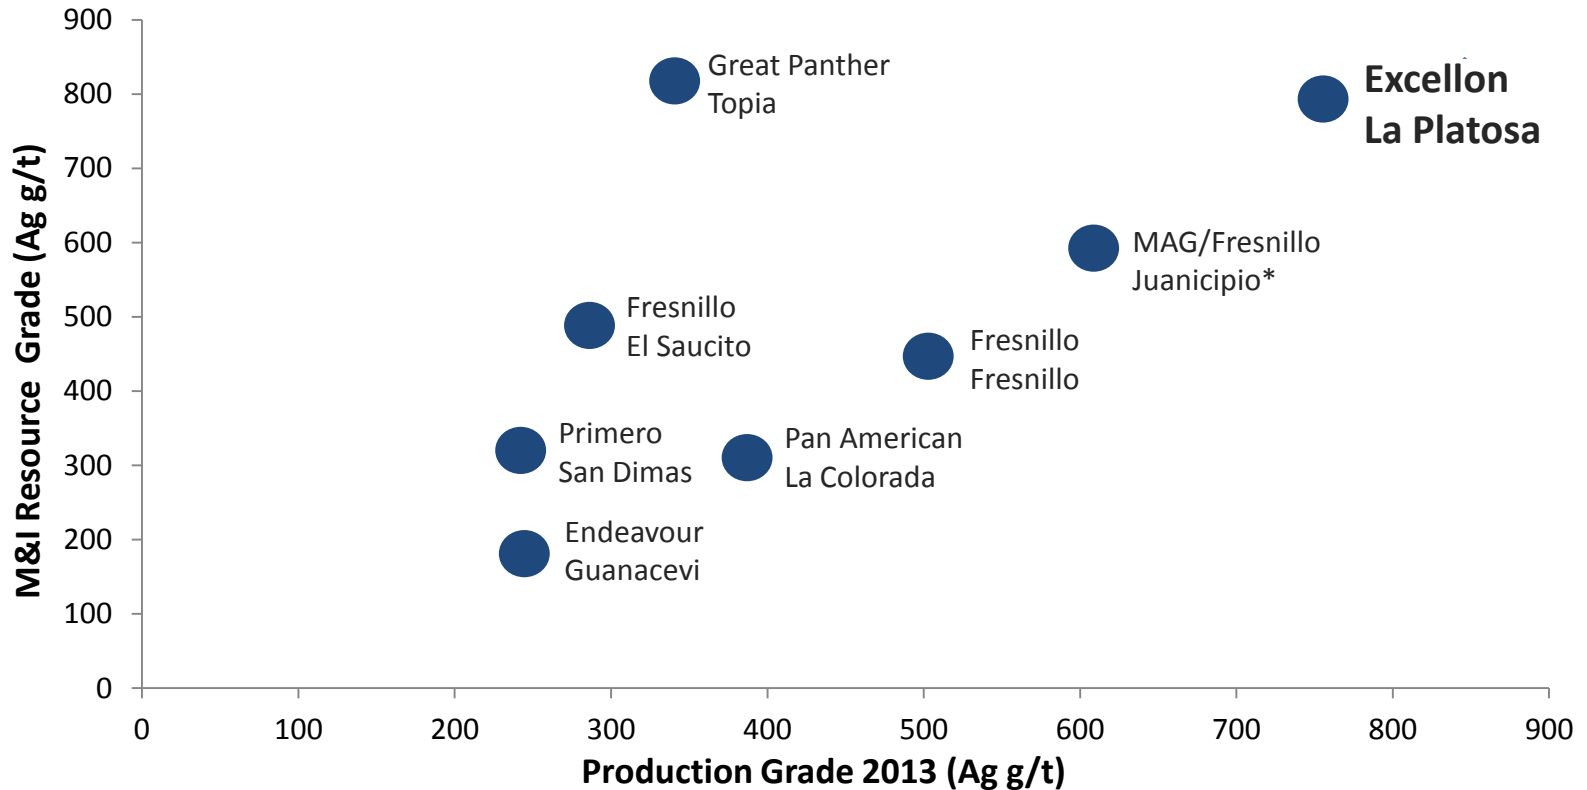

EXPERIENCED TEAM

Management depth and the strongest board in junior mining

TRANSPARENT AND RESPONSIBLE MINING

Committed to social and environmental responsibility

Platosa's High Grade Advantage

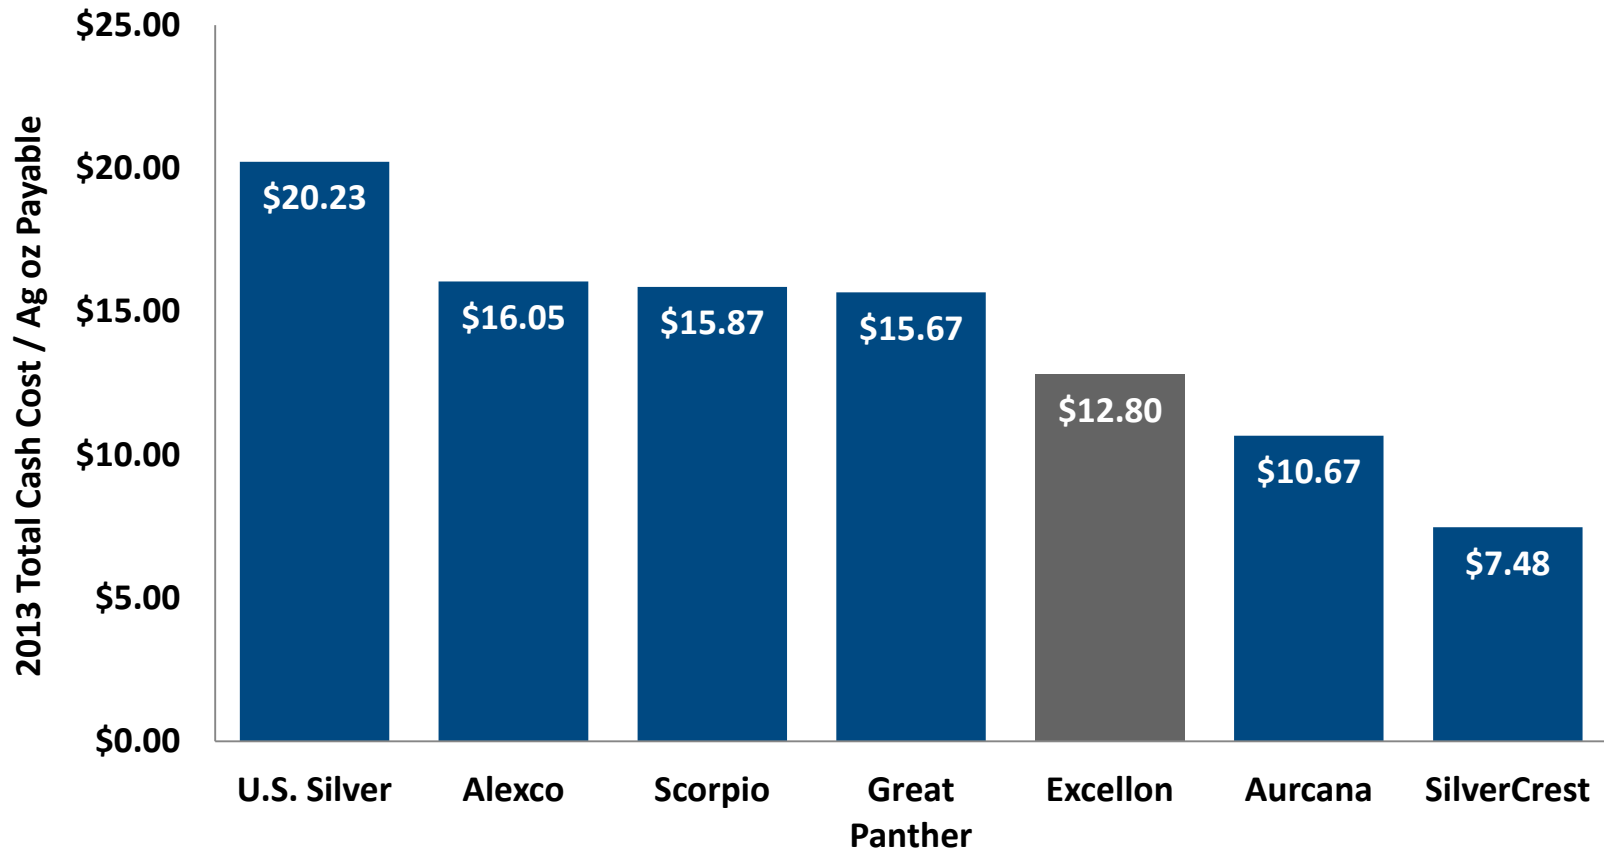

*Development stage project

HIGHEST GRADE RESOURCE AND PRODUCTION

Track Record of High Grade Production

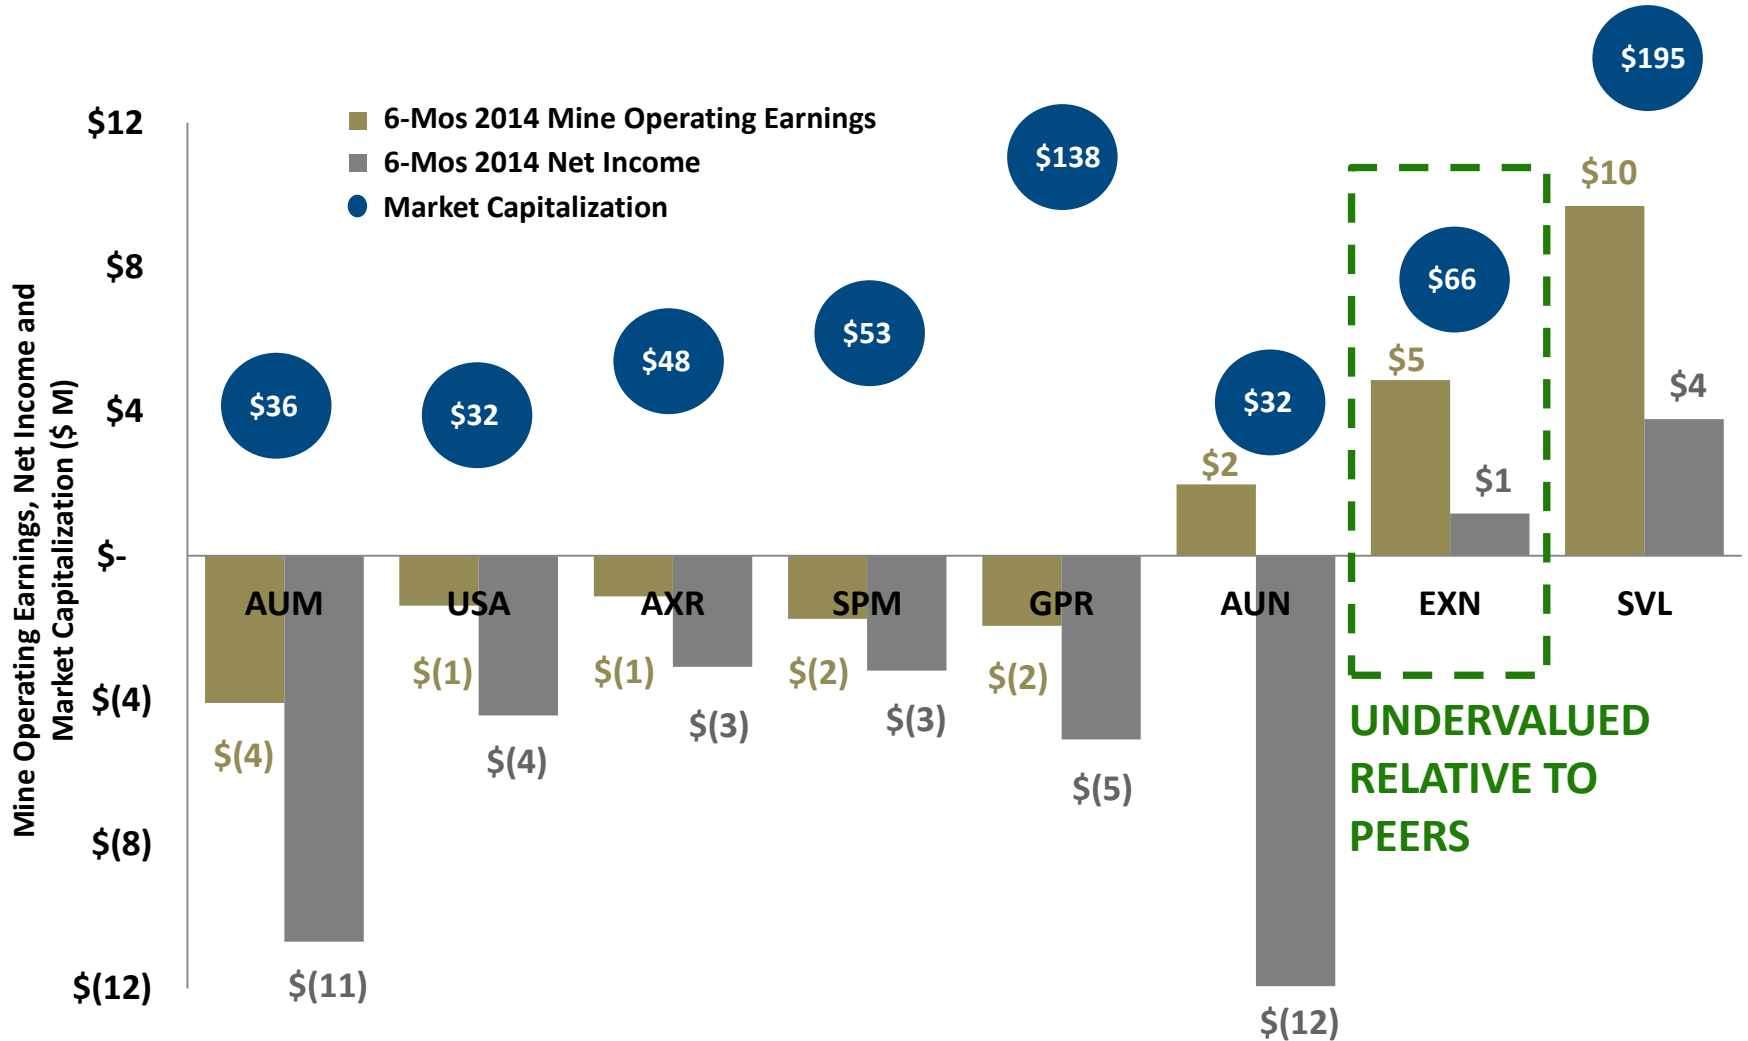

One of the Lowest Cash Cost Producers

* Information is based on public disclosure documents

Junior Silver Producer Comparison

*As of October 17, 2014. All figure amounts are in thousands or millions of dollars and are based on public disclosure documents.

La Platosa Mine Production Results

		Q3 2014	6-Mos 2014	2013	2012
Tonnes Milled		14,078	38,457	69,862	48,199
Grades	Ag (g/t)	550	607	718	846
	Lead (%)	7.03	6.58	6.14	6.75

EXCELLENT INFRASTRUCTURE, ACCESS AND SECURITY

Quality Resource: A Platform for Growth

- 453,309 tonnes mined at 974 g/t Ag, 7.9% Pb and 9.5% Zn – 2005 to 2013
- Remaining resource at over 1 kg/t AgEq

La Platosa 2013 Mineral Resource Estimate

Category	Tonnes ('000s)	Ag (g/t)	Pb (%)	Zn (%)	AgEq (g/t)	Ag (M oz)	Pb (M lb)	Zn (M lb)	AgEq (M oz)
Measured	42	825	8.62	11.31	1,358	1.1	7.9	10.4	1.8
Indicated	443	772	8.40	10.05	1,270	10.9	81.9	98.0	18.0
M&I	484	777	8.42	10.15	1,277	12.0	89.8	108.4	19.8
Inferred	3	2,234	16.93	1.74	2,922	0.26	1.2	0.13	0.3

Notes:

1. CIM definitions were followed for the classification of Mineral Resources.
2. Mineral Resources are estimated at an incremental NSR cut-off value of US\$189 per tonne.
3. Net smelter return metal price assumptions: US\$20.00/oz Ag, US\$1.00/lb Pb, US\$1.00/lb Zn.
4. Metal recovery assumptions: Ag 94%, Pb 85%, Zn 84%.

5. The silver equivalent (AgEq) is estimated from metallurgical recoveries, metal price assumptions, and smelter terms, which include payable factors, treatment charges, penalties, and refining charges.
6. The estimate is of Mineral Resources only and, because these do not constitute Mineral Reserves, they do not have any demonstrated economic viability.
7. Mineral resource estimate prepared by David Ross, P.Geo., of Roscoe Postle Associates Inc., independent geological and mining consultants of Toronto, Ontario. Prepared as at December 31, 2013.
8. Totals may not add or multiply accurately due to rounding.

2014 Production Outlook

PRODUCTION GUIDANCE 2014

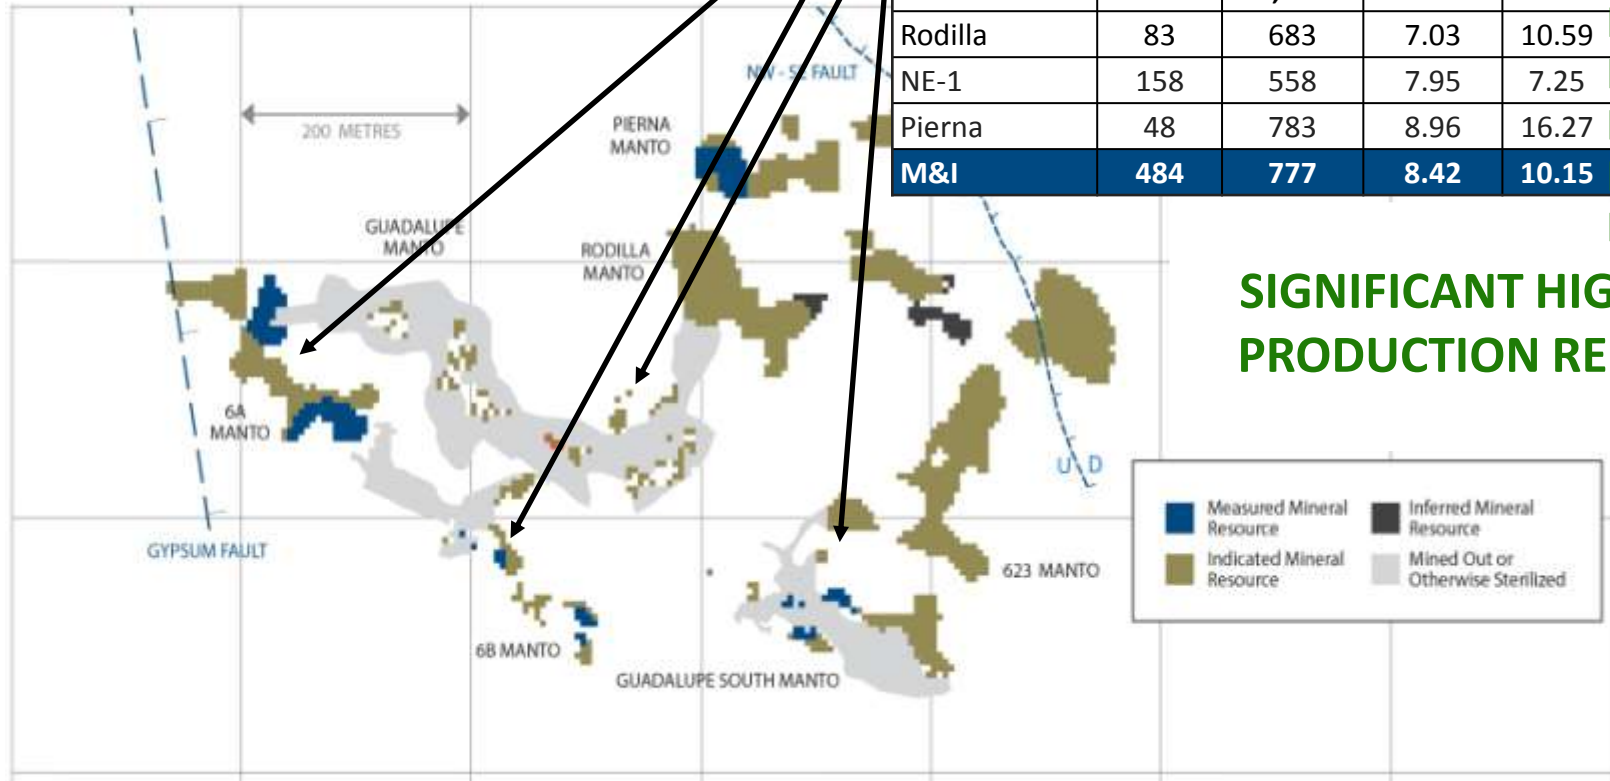

1.4 – 1.6 million ounces Ag

7.5 – 8.5 million lbs Pb

9.0 – 10 million lbs Zn

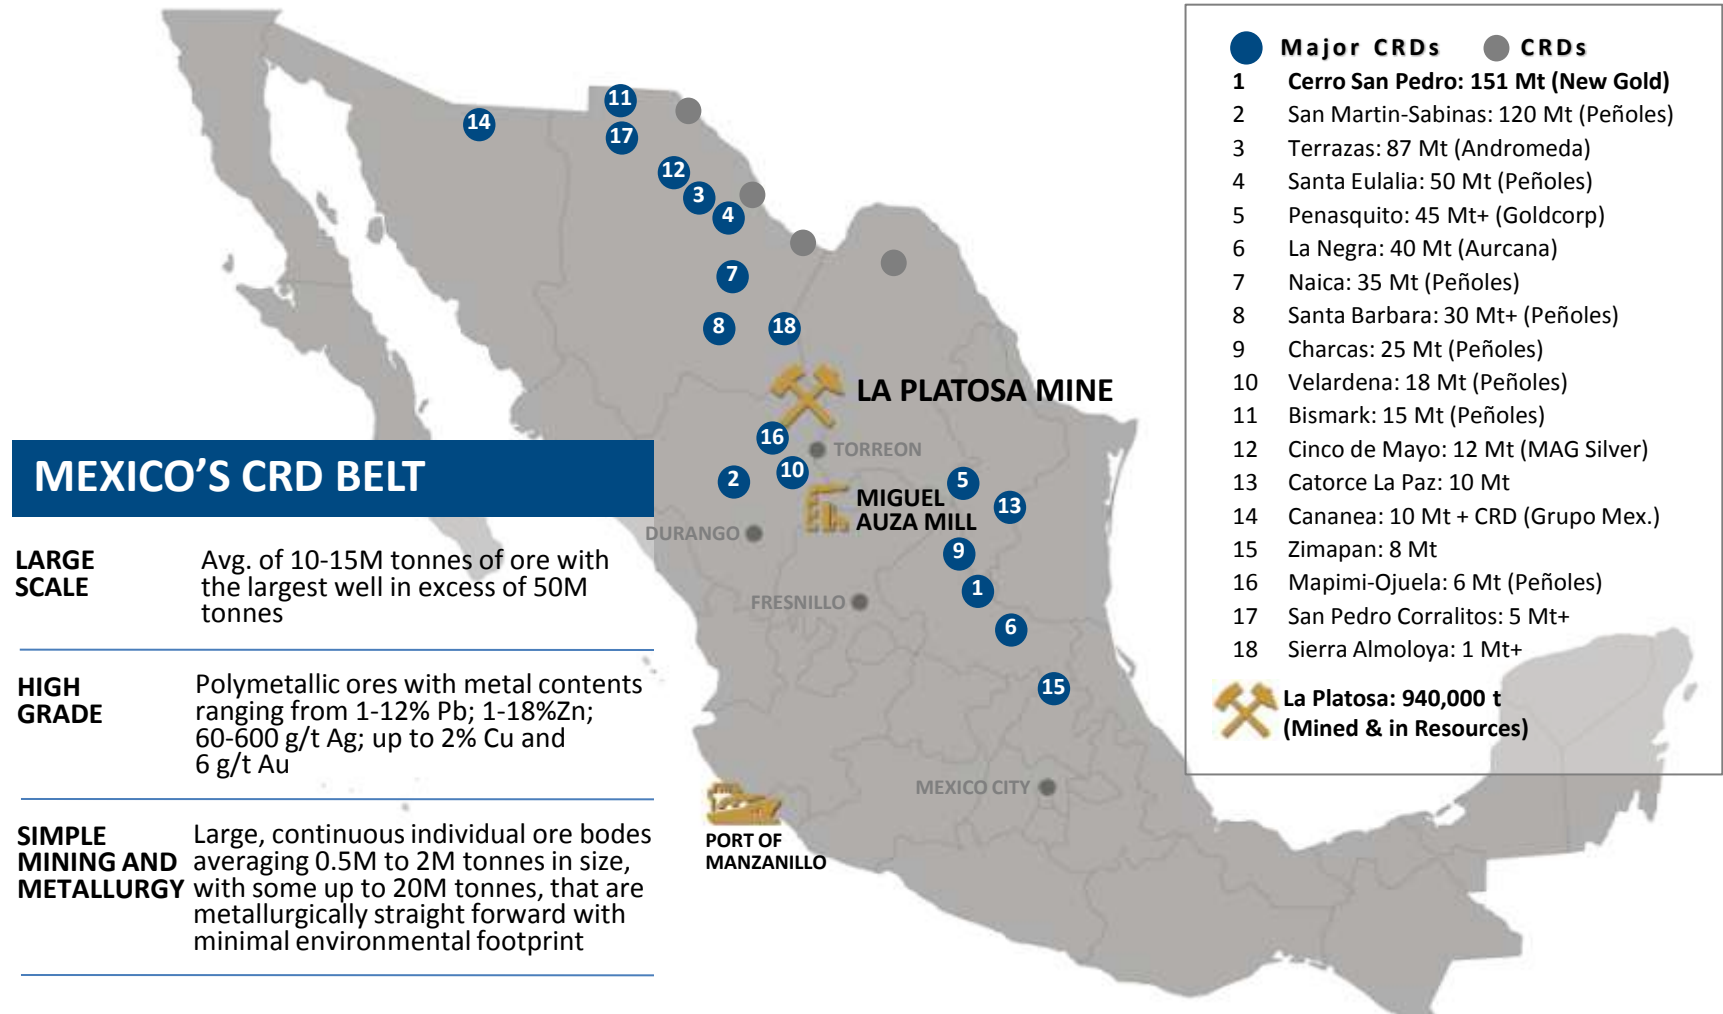

2.1 – 2.3 million ounces AgEq

Area/Manto	Tonnes (kt)	Ag (g/t)	Pb (%)	Zn (%)	Ag Eq (g/t)
6A/6B	68	753	8.51	10.79	1,271

SIGNIFICANT HIGH GRADE PRODUCTION REMAINING

Platosa is in the Right Place

TOP SILVER PRODUCING COUNTRY IN THE WORLD

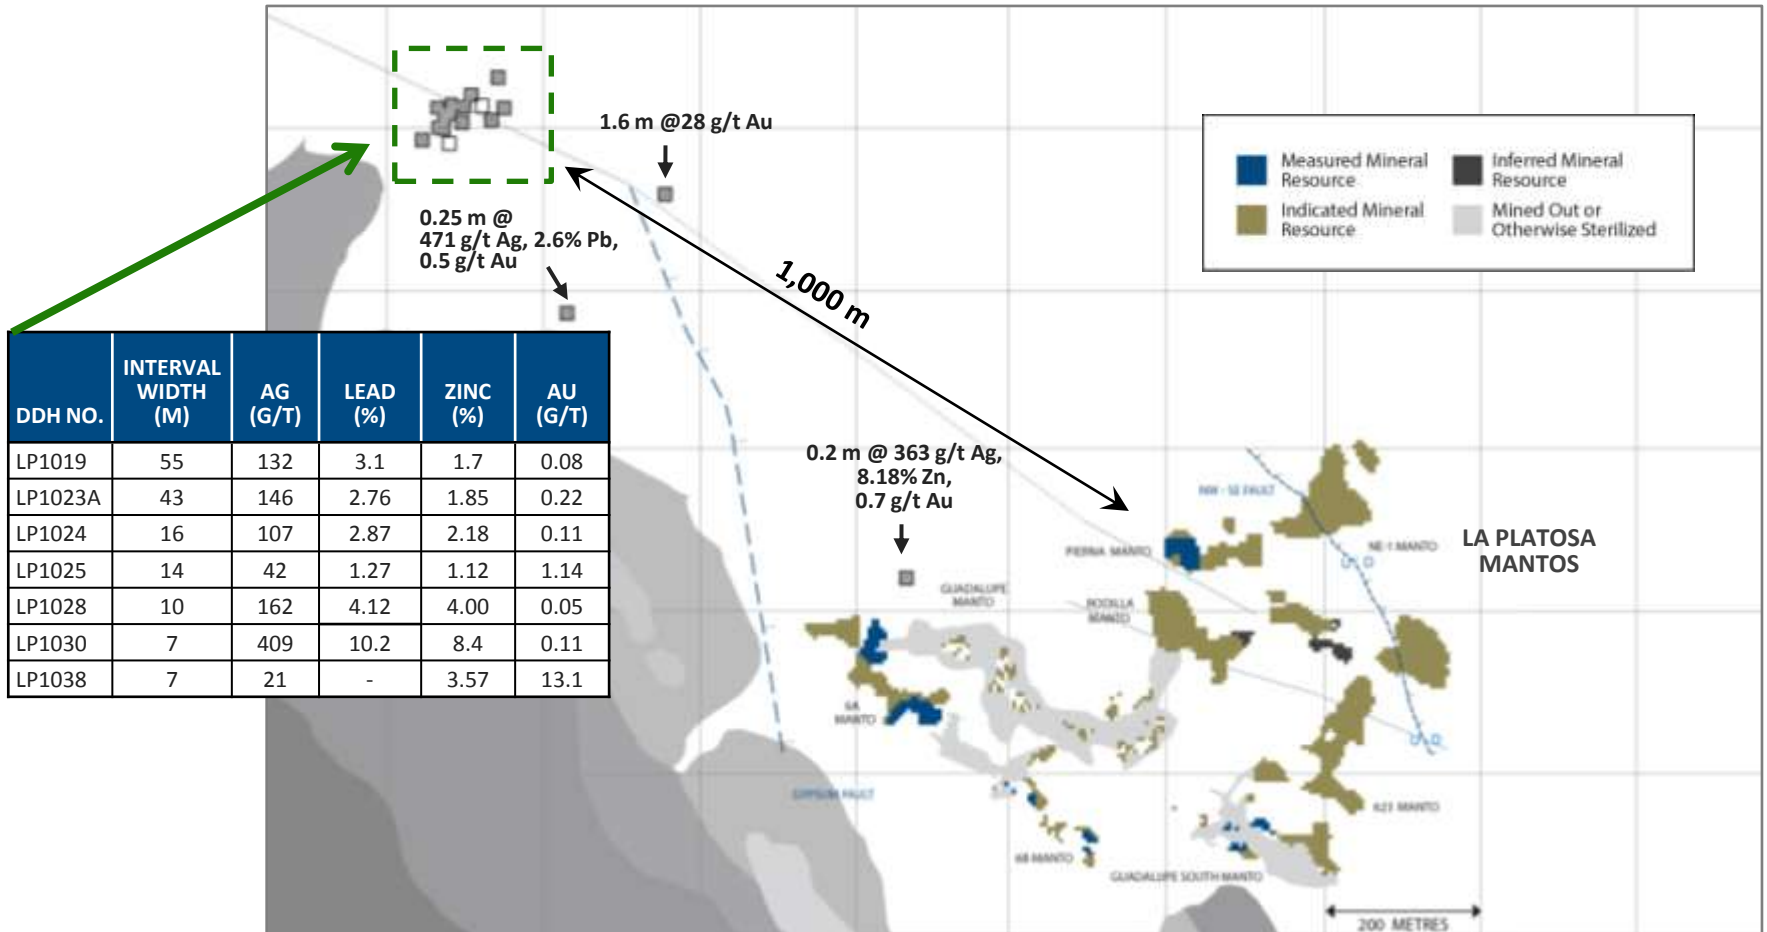

CRD Model – Finding the “Source Deposit”

The high-grade mantos of Platosa are found on the periphery of a major Carbonate Replacement Deposit System (CRD)

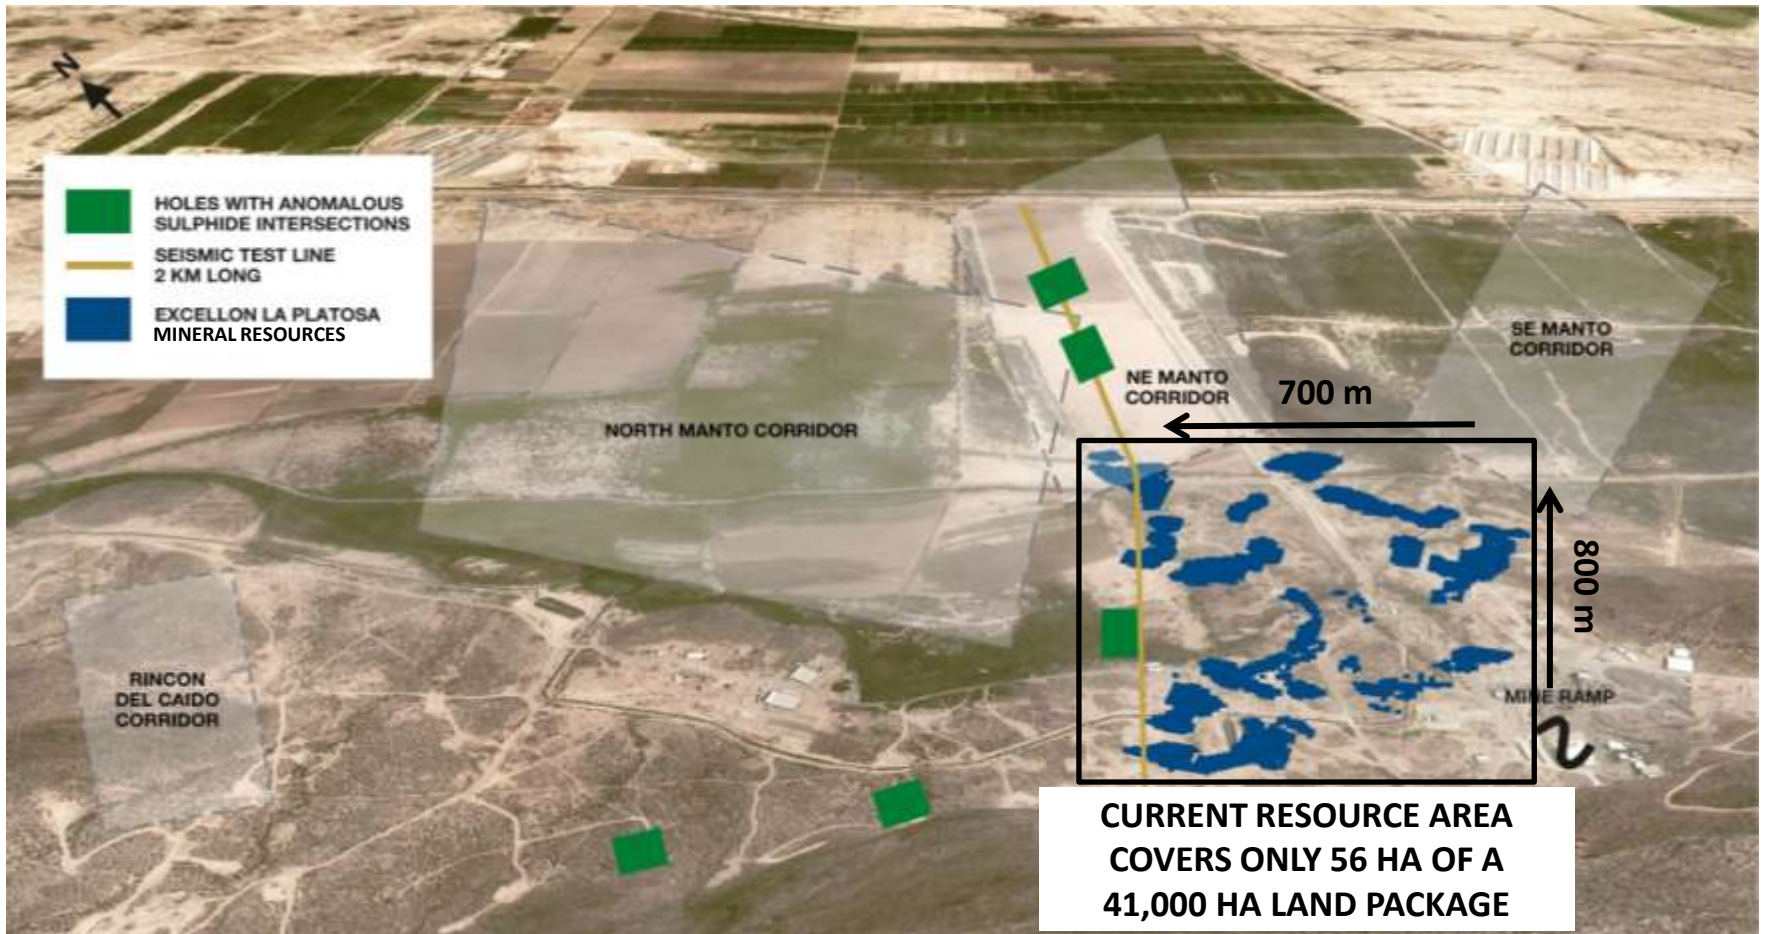

Source Style Discovery less than 1km from Platosa

RINCON DEL CAIDO DISCOVERY PERIPHERY OF THE SOURCE?

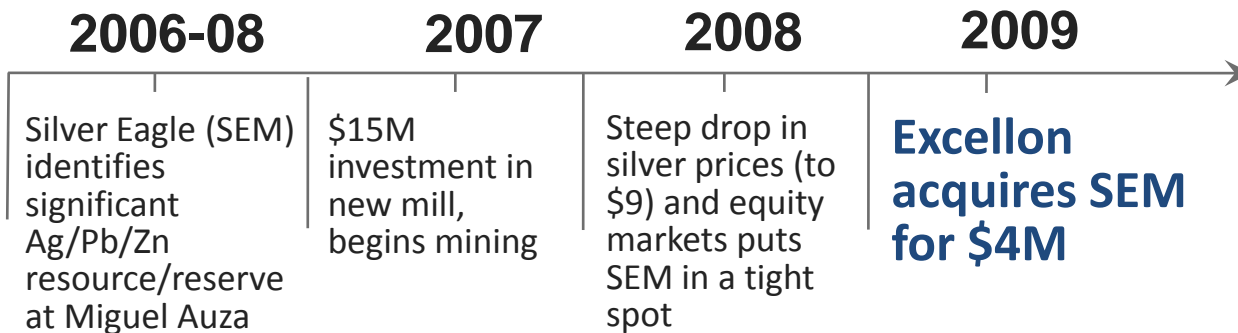

Plan View of the Platosa Mine Area

SIGNIFICANT ROOM TO GROW RESOURCES

Miguel Auza Mill and Mine – Silver Eagle Transaction

- Acquired brand new, scalable, 650 tpd mill (\$15M value) with 45% spare capacity in June 2009
- 41,000 ha of mineral rights on primary silver belt
- \$22M of loss carry-forwards, still creating value
- Ag recovered from Platosa has increased from 70% pre-acquisition to +90% today

Capitalizing on opportunities in volatile markets

Active and Involved

- **100% Mexican workforce** of 352 employees and contractors
- **Engaging** with local communities of Bermejillo and Mapimi
- **Partnering** with local, state and federal governments
- **Sustainable community investments** in health, education and social infrastructure

Active Memberships

2014 Objectives

PRODUCTION

Produce 2.1 to 2.3M AgEq oz
Generate positive cash flow
Enhance low-cost profile

EXPLORATION

Discover new high-grade mantos near existing operations, follow up on Source style discovery

GROWTH

Analyze and pursue acquisition opportunities

Why Silver?

Source: The Silver Institute, The London Bullion Market Association

Includes:
 Electrical and Electronics
 Brazing Alloys & Solders
 Photography
 Other Industrial Demand

- **Record levels of physical demand**
 - 13% increase in physical demand to 1,081M oz. in 2013 vs. 954M oz in 2012
- **Largest physical deficit since 2008**
 - Total supply of 978M oz. in 2013 vs. 1,005M oz in 2012
- **ETF holdings held on to record levels in spite of significant move away from commodities**
- **New and growing uses of silver in:**
 - Medical instruments and hospital equipment
 - Electrical contacts and photovoltaics
 - Superconductors, computers and batteries
 - Nanotechnology
 - Solar power
- **Monetary debasement**
 - Money creation in a deflationary period (2008-today) that has flooded the world economy with fiat currency

**Our vision is to be a
premier silver producer by**

**capitalizing on generational opportunities and striving to always do better
for our shareholders, employees and neighbouring communities**
