

EXPLORING FOR MAJOR COPPER AND GOLD MINES.

Strategic | Disciplined | Responsible | Committed

| May 2026

Coppernico is a mineral exploration company focused on creating value for shareholders and stakeholders through project evaluation and exploration **in pursuit of the discovery of large-scale high-grade copper-gold deposits in the Americas.**

Management and technical teams have a successful track record of raising capital, discovery and monetization of exploration successes. Coppernico is **currently focused on the Sombrero Project in Peru.**

Sombrero Project - Major Discovery Opportunities

- **Eocene intrusion cluster** with associated **Fe-Cu skarn mineralization**
- **3,900m elevation** with excellent infrastructure
- **First-ever copper-gold drilling** in this underexplored district
- **Strong community partnerships**
- **Initial drill targets share key characteristics with major copper mines in the belt like Las Bambas:**
 - **Scale** – Multiple large targets comparable to world-renowned deposits in the belt
 - **Rock type** – Extensive exoskarn formations with similar lithologies (Ferrobamba, Huahuani, Andahuaylas-Yauri Batholith)
 - **Mineralization style** – Massive Fe-Cu skarn mineralization found at surface
 - **Age of mineralization** – Eocene-aged intrusion
